SPECIALIST TRAINING IN THE AWS STANDARD

EDINBURGH

11th November 2019

(venue details confirmed upon registration)

**An AWS accredited training program for sustainability and water management
professionals & specialist service providers**

**Presented by Pinnacle Quality in partnership with BMTRADA
(AWS approved training organisation)**

The AWS International Water Stewardship Standard (the AWS Standard) is the globally-consistent framework for implementing water stewardship, helping major water users to understand and improve their water use in the context of a catchment.

Conformity with the AWS Standard enables credible recognition of meeting international best practice.

The **AWS Specialist and Auditor Training Program** is a one-day course for people seeking accreditation as AWS accredited auditors, consultants and trainers. From an auditor's perspective this course examines the requirements of the AWS verification processes. For specialists it will examine the value proposition for water stewardship compliance and the business case for water stewardship. This course is accredited and recognised by AWS as meeting the Level 3 requirements for professionals seeking accreditation as an AWS accredited auditor, consultant or trainer.

PROGRAM OBJECTIVES

The AWS Specialist Training Program aims to:

- Equip Auditors and specialist service providers with a deeper knowledge of the application of the water stewardship system to water using sites
- Provide potential auditors specialist service providers with an understanding of the AWS verification system and its requirements
- Provide potential auditors specialist service providers with an understanding of the AWS accreditation program and its requirements
- Support specialist service providers in developing a business case to market their services to business and organisations likely to engage with water stewardship.

WHO SHOULD ATTEND?

- People who want to become accredited AWS auditors
- People interested becoming AWS accredited, consultants or trainers.

PRE-REQUISITES

The program will be taught in English so participants will be expected to have a satisfactory grasp of English. Participants will also need to have completed the Foundations of Water Stewardship and Advanced Training in the AWS Standard programs before undertaking this course.

ACCREDITATION AND INTELLECTUAL PROPERTY

This program is based on implementation of the AWS International Water Stewardship Standard, a standard owned by the international Alliance for Water Stewardship (AWS).

INVESTMENT

\$400AUD per person which includes materials and certification.

A 20% discount is available for 3 or more participants from the same organisation.
